6.6 DVR FOLDERS

Recordings of the same program are organized into a folder so they are easier to sort through. If you want to view your programs individually, you can turn off DVR Folders through the DVR Setup menu on the primary DVR.
Understanding Parental Control
Digital TV allows users to control viewing by using the following features:

**Ratings Locks** — Allows customers to restrict viewing by rating. If you have ‘restricted’ a rating, the viewer will require a PIN code to watch the program.

**Hide Adult Titles** — In the guide settings, turn on the ‘Hide Adult Titles’ option to prevent any ‘Adult-rated’ titles from showing in any menu.
*Please note that the above features use the ratings provided in the program information of the iGuide.*

**Purchase PIN** — Restricts purchases made with the remote control. When this feature is activated, anything that has a one time charge associated with it will require the PIN code be entered during the order process. This will work for any Pay-Per-View order, including OnDemand options.

**Service Lock** — Restricts access to the OnDemand service in general, and asks for the PIN code when trying to access the menu. This way, customers can have control over who can view titles and use OnDemand.

**Do I need any additional equipment to receive this service?**
No. All you need is an EastLink Digital TV Receiver.

**Are there any additional programming fees to use The Movie Network OnDemand & Mpix OnDemand service?**
No. These are FREE with your subscriptions to The Movie Network and Mpix. However, other options will be added to the OnDemand menu in the future that will allow you to select other OnDemand programming on a Pay-Per-View basis.

**If I have an EastLink Digital Video Recorder (DVR), can I record The Movie Network or Mpix programming?**
Yes, you can for regularly scheduled programs (channels 201-207), but when in OnDemand mode, programming cannot be recorded.
**Where is the OnDemand service available?**
The majority of EastLink customers will have access to OnDemand and we are working hard to upgrade the few areas that cannot. Visit eastlink.ca or consult EastLink Customer Service for more information.

**How can EastLink provide OnDemand service when other providers can’t?**
The EastLink fibre optic network allows for the two-way storage and retrieval technology needed to deliver OnDemand services. Digital TV technology is the platform of the future in home entertainment.

**How do I check a Receivers Message?**
A receivers message is indicated with a flashing red light on the receivers display panel. Press the Menu button on your remote followed by the House icon on the Main Menu screen. Arrow down on the Main Menu screen until you get to the Messages option. Select the Messages option to view your unread messages.

**How to I change my Priority shows?**
The priority function allows you to prioritize your recorded shows. Press the Menu button on your remote. Select the DVR icon then select the Series Recordings option. The left column indicates your current prioritized shows ranked in order. Highlight a show and use the Page Up/Page Down buttons on your remote to change its priority ranking. Use the Checkmark icon to confirm change.
